11 DESIGN CONCEPT

The Interlock

Two monoline squares drawn on one strict grid with a single stroke weight: one in navy for the client's records, one in brass for independent review. Offset and woven together, the navy square passes over the brass at the first crossing and under it at the second, with a precise gap at each crossing. Neither square can be pulled away without the other, which is the essence of assurance: your records and an independent, professional review locked together into one trustworthy whole. Exact geometry and a clean sans-serif wordmark keep the identity modern, rigorous and highly legible.
